# SCHOOL YARD BIRD SURVEY

How many different species did we see?

Things we could do to improve the diversity of birds at our school:

Provide water  
for the birds

Do we have water for the birds to drink in the school yard?

Can we make this better?

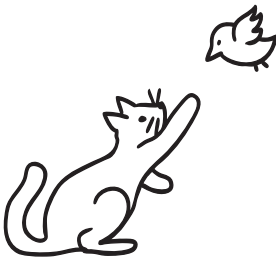

Plant natives to  
provide extra food

Do we have enough native flowering plants for birds to eat from?

Can we make this better?

Keep birds safe  
from predators

Are local cats kept inside to protect local birds?

Can we make this better?
